

# JCAI COMPANY PROFILE

2025

Building Your Streamlined Future with Custom AI & Automation

# ABOUT JCAI CONSULTING

## Who We Are:

JCAI Consulting is a specialized firm focused on empowering businesses by designing, building, and implementing bespoke Artificial Intelligence (AI) and automation solutions. We partner with organizations to transform their operations, moving beyond off-the-shelf software to create systems perfectly tailored to their unique needs.

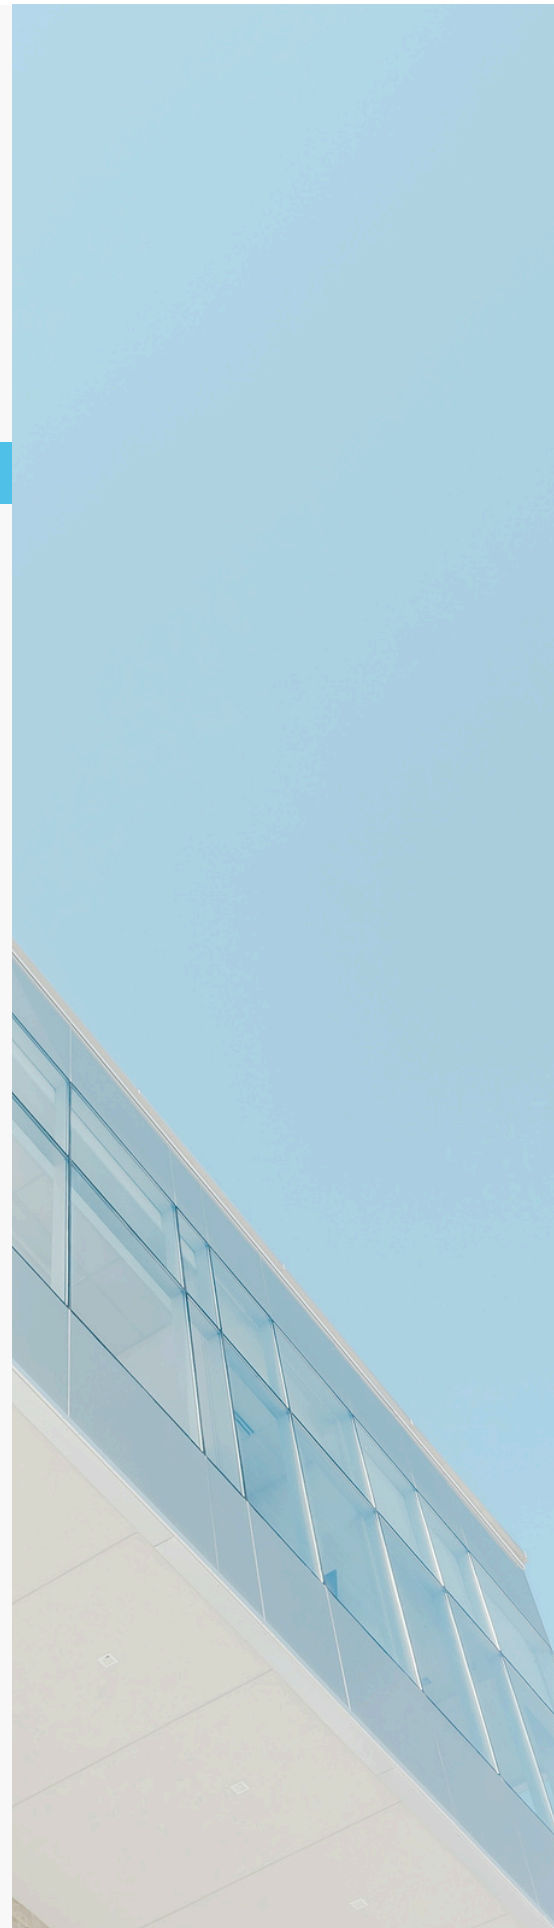

# MISSION

01

Our mission is to **eliminate tedious and repetitive tasks** that hinder business growth and employee satisfaction.

02

We strive to **streamline operations** through intelligent automation, allowing our clients to redirect their focus and resources towards **what truly matters** for their strategic success.

# LEADERSHIP & EXPERTISE

## 01 Leadership & Vision

Founded and led by Jonathan, bringing strong business and financial acumen to bridge the gap between strategic goals and technical solutions.

## 02 Expert Technical Team

Powered by a dedicated team of six highly skilled experts specializing in AI, programming, neural networks, and automation architecture.

## 03 Collaborative Approach

We integrate business strategy with deep technical capabilities to build solutions that deliver real-world impact.

## 04 Core Capabilities

Proficient in multiple coding languages, AI model implementation, prompt engineering, and system integration.

# THE CHALLENGE:

## The Hidden Cost of Inefficiency

In today's competitive landscape, manual processes, repetitive administrative tasks, and disconnected systems create significant drag on businesses of all sizes.

This operational friction leads to:

- **Wasted valuable employee time and resources.**
- **Increased risk of errors and inconsistencies.**
- **Slowed operational speed and reduced scalability.**
- **Limited ability to focus on strategic growth and innovation.**

# SOLUTION

## Bespoke AI & Automation Systems

JCai Consulting addresses these challenges head-on by building custom AI and automation solutions from the ground up. We believe generic software provides generic results. Our bespoke approach ensures:

### Precision Fit:

Solutions designed specifically for your workflows, data, and objectives.

### Unique Problem Solving:

Ability to tackle complex, niche challenges standard tools cannot address.

### Intelligent Automation:

Leveraging AI to handle not just simple tasks, but complex decision-making and interactions where appropriate.

# WHY PARTNER WITH US?

- **Truly Bespoke Solutions:** Get automation built exactly for your needs, not a workaround.
- **Deep Technical Expertise:** Access a dedicated team skilled in cutting-edge AI, programming, and neural networks.
- **Business Acumen Meets Tech Power:** Benefit from leadership that understands business goals combined with a team that can execute technically complex solutions.
- **Results-Driven with Guarantee:** We focus on delivering ROI. For defined administrative processes, we offer a guaranteed minimum 20% reduction in manual processing time.
- **Direct Partnership & Collaboration:** Work closely with our team, guided by our core values of Partnership and Client Success.
- **Future-Proof Your Operations:** Implement scalable AI and automation to stay competitive and efficient

# OUR CAPABILITIES

- **Intelligent Workflow Automation:** Automating multi-step processes across departments (HR, Finance, Marketing, Operations).
- **Custom AI Agent Development:** Building AI agents for tasks like customer service triage, internal knowledge retrieval, data analysis summaries, and more.
- **Seamless System & API Integration:** Connecting disparate software applications to ensure smooth data flow and unified operations.
- **Automated Data Processing & Analysis:** Automating data extraction, transformation, cleaning, and report generation.
- **AI-Powered Communication Systems:** Developing solutions for automated responses, intelligent routing, and personalized communication.

# OUR APPROACH

## DISCOVER & DEFINE:

We work closely with you to understand your goals, pain points, and processes, identifying high-impact opportunities.

## DESIGN & ARCHITECT:

We map out the optimal custom solution, defining technology, workflows, and integration points.

## BUILD & DEVELOP:

Our expert team constructs your tailored AI and automation system using robust, scalable technologies.

## IMPLEMENT & OPTIMIZE:

We deploy the solution, ensure seamless integration, monitor performance, and provide ongoing support.

# WHO WE HELP

## Ideal Client Scenarios

### JCai Consulting is ideally suited for any business feeling burdened by:

- Time-consuming manual data entry and repetitive tasks.
- Inefficient workflows and operational bottlenecks.
- Disconnected software systems hindering productivity.
- A need to scale operations or customer support efficiently.

### Imagine the Possibilities:

- Reclaim hundreds of hours annually across your team.
- Improve data accuracy and reduce costly errors.
- Instantly handle a significant percentage of common customer inquiries via AI.
- Accelerate key processes like reporting or onboarding.

# CORE VALUES

## Guiding Our Partnerships

- **Innovation:** Constantly exploring and applying cutting-edge AI and automation.
- **Partnership:** Working collaboratively and transparently with our clients.
- **Result-Driven:** Focusing on delivering measurable outcomes and tangible value.
- **Client Success:** Aligning our efforts directly with the success and growth of our clients.

# LET'S BUILD YOUR SOLUTION

## 1. Month

### Strategy and Planning

We strategically define and construct the tailored automation solutions by understanding the Workflow and processes you use.

## 2. Month

### Building and Activation

We Build the Tailored Automation Solutions and Intigrate into your system

## 3. Month

### Monitoring and Training

We Test and monitor the system to make sure there are no issues.

We provide easy to understand Training and Tutorials on how to use the system

## Continued

### Bug Fixes and Updates

We will regular check for Bugs and have a 24/H Service availability.

We implement and update to the newest AI Technology to ensure the best outcomes

# OUR TEAM

While led by our founder, JCai Consulting's strength lies in its dedicated team of technical experts who bring AI and automation visions to life

Teamwork  
Efficiency

**92%**

Skills &  
Knowledge

**96%**

Socialization  
Between Teams

**91%**

**Jonathan Talaska**

Chief Executive Officer  
& Founder

**Christian Scheidt**

AI Automation Specialist  
& Director of Dev Experts

**Tommy Braga**

Chief Operating  
Officer

# THANK YOU

## We are ready to assist you

We are ready to assist you. Let's discuss how JCai Consulting can partner with your company to build custom AI and automation solutions that drive real results.
